WARNING: *Mid Back Pain Sufferers...*

***If Your Mid Back Pain Comes And Goes,
And You're Sick And Tired Of Feeling Older
Than You Are, Then You Need To Read This
Free Report!***

Important Message To All Mid Back Pain Sufferers:

If you are experiencing mid back pain, you are probably not living life to it's fullest. Simple tasks like: putting a pair of shoes on , shaving, driving a car, and prolonged sitting or standing can be very difficult.

The problem with back pain is that it usually doesn't cause things we associate being sick with such as a fever, dizziness, or being nauseous, but like the flu, it can keep you from performing normal activities of daily living.

Signs and Symptoms include but are not limited to:

- Numbness
- Tingling
- Burning Sensations
- Weak feeling in the mid back
- Dull Ache
- Shooting pains
- Spasms
- Stiffness

Most back pain sufferers will immediately turn to pain relief medications. Others consult their medical doctor. Usual treatment consists of either a stronger pain relief medication or a muscle relaxant. If that doesn't work, often physical therapy is prescribed.

There is a lot of confusion among health care providers as far as the best treatment for mid back pain sufferers.

Here's what most, if not all doctors agree on:

- 1.) Improper back function creates improper healing.
- 2.) Improper healing causes scar tissue that can cause joint stiffness.
- 3.) Joint stiffness decreases nutrition to the discs of the mid back.
- 4.) Discs that lose nutritional fluid due to a lack of motion degenerate.
- 5.) Degenerative Discs can lead to arthritis, further pain and more frequent flare-ups.

Unfortunately, most back pain sufferers aren't told the truth about their back pain.

That is why this report was written.

SHOCKING INFORMATION REVEALED ON NEXT PAGE=>

MID BACK PAIN IS NOT CAUSED BY A

LACK OF MEDICATION!!!

FACT: 95% of the population will experience BACK PAIN at some point in their life!

Mid Back Pain Causes More Than Just Pain

Back Pain causes sick days from work and a disruption of leisure activities. Mid Back Pain can affect normal sleeping patterns and is even known to cause relationship problems.

Frequent complaints of back pain sufferers include:

- Difficulty Breathing
- Chronic Fatigue
- Feeling Older
- Sense Of Helplessness

MANY PEOPLE HAVE OTHER COMPLAINTS THAT FOLLOW THEIR BACK PAIN:

- Difficulty Sleeping
- Weakness in their Back and Arm Muscles
- Slumped Over Compressed Feeling
- Muscle Cramping
- Horrible Posture
- Numerous Other Complaints

Of the people that encounter these situations, many do not see a correlation between MID BACK PAIN and their malfunctions. Unbeknownst to them, numerous times there is a DIRECT CORRELATION between their MID BACK PAIN and their complaints! Let's hope that you haven't encountered any of these symptoms, YET!

BACK PAIN CAN GO AWAY BY ITSELF!

That's the GOOD NEWS!!

Unfortunately, there is some bad news also, If you choose not to hear the bad news..... **STOP READING THIS NOW BEFORE WE UNCOVER THE BAD NEWS. I WISH YOU THE BEST OF LUCK!, and I am pretty sure you'll find out about the bad news later on down the road. I just hope it won't be too late for you!!**

And for those of you who want PAIN RELIEF, Congratulations!!! I commend you for reading on, you won't be disappointed that you read on!

THE BAD NEWS:

“If You Choose To Ignore What Your Body Is Screaming At You To Take Care of (Your Mid Back Pain) It May Just Go Away!

However, IT WILL COME BACK AT A LATER DATE , and When It Does, You had better hold on to your britches, because the pain you WERE EXPERIENCING BEFORE is going to be small potatoes to the pain you WILL EXPERIENCE DOWN THE ROAD!”

Every mid back pain episode that you experience, happened for a reason & there is a cause to why it has happened. It WILL lead to further degeneration even after the pain goes away. That's why you need to take care of it the first time, so you don't have to go through the hassles and pains of the second, third, and fourth times! Each time it gets progressively worse and longer to get rid of!

So it is important to know what to do and what not to do if you experience Mid Back Pain.

- 1.) Immediately after a mid back pain episode, APPLY ICE, NOT HEAT! HEAT can increase inflammation and create an environment for the laying down of scar tissue. Never directly apply ice to your skin. Wrap the ice in a moist towel or plastic bag. Ice can be applied for 10 minutes per hour to decrease inflammation and decrease pain.
- 2.) Prolonged sitting can make back pain worse. Try to stand and move around for at least a couple of minutes ever 20 minutes.
- 3.) Stay away from caffeine or other stimulants and drink plenty of water.
- 4.) Visit a Doctor of Chiropractic to assure proper joint and nerve function. Chiropractic care is safe and affordable. It can keep your back young.

**More and More Back Pain Sufferers Are GOING TO CHIROPRACTORS
Instead Of Their Regular Doctors!**

Back pain has many causes, including spinal tumors, protruding discs, ankylosing spondylitis, spinal stenosis, arthritis, fibromyalgia, osteoporosis, obesity, pregnancy, back sprains or strains, thoracic dysfunction, rib dysfunction, and muscle syndromes.

QUESTION: If you are taking medication to cover up your MID BACK PAIN and are getting great results with it, how do you know when you make your injury worse

**and start the degeneration process, if you can't feel anything?
ANSWER:.....YOU DON'T!**

Numerous people think pain medication is the ANSWER to their problem. Yet in reality, covering up their pain and not finding the CAUSE of their pain is the worst thing they can do!

There is no better way to prepare yourself to "go under the knife" then to ignore your back pain and cover it up with pain medication!!!

**Would You Be Interested In Finding Out
THE UNDERLYING CAUSE Of Your Pain?**

Numerous people are exploring this option of finding out the **REAL CAUSE** of their pain. These same people are now living pain free lives and **CONTINUE** to live **PAIN FREE!**

Do You Know That A Majority of People Who WERE Suffering From Mid Back Pain have UNCOVERED THE SECRET! That's right!!! Once they found out this revealing information on why they have encountered this pain, they have taken the steps necessary to get the **RELIEF AND RESULTS** they were **BEGGING FOR!** Now they are engaging in their favorite hobbies again, able to pick up their children and give them hugs and kisses, raise their energy level and outlook on life! **IT'S POSSIBLE FOR YOU TOO!!**

Why do only so few people know about this secret?

Because many of the conventional therapies people have tried, **JUST DON'T WORK!** Many of the practitioners you have seen do not know about this secret of why you have **MID BACK PAIN**, and if they do, they are not telling you in fear that they are going to lose a lot of business!

**WHY NOT TRY A NEWLY FOUND SECRET ON EFFECTIVE RELIEF OF
PEOPLE'S MID BACK!**

Many people are barking up the wrong tree when trying to get relief through the usual conventional methods. TRY SOMETHING NEW!

*You Didn't Expect To Request This **FREE REPORT**, Read It, And Not Know The Secret, **DID YOU?** So Buckle Up, And Become One Of The **FEW People Privy To This Information!***

SO, HERE WE GO!

Your vertebrae in your spine protect the most vital organ in your body, your BRAIN & SPINAL CORD! Throughout your lifetime, you will undergo many types of stress (chemical, psychological, accidents, falls, bad posture, lifting, bending, and many others.)

This stress causes your vertebrae to SHIFT out of their proper position and lean on or put pressure on your spinal cord and spinal nerves. This CHOKES OFF the communication between your organs & muscles, and your BRAIN! If your muscles and organs don't communicate with your brain, they aren't going to work properly. They get lazy and don't do the required amount of work they are suppose to do. The rest of your body is depending on them to work, but since they don't have any idea of what they are suppose to do because they are not getting any orders from the brain...they take a little vacation time. WELL, in order for your body to work properly, all of the muscles and organs depend on each other & MUST have 100% communication between themselves and the brain, in order for everyone to get their job done!

Now what usually happens when someone in your workplace doesn't do the work they are supposed to?

CORRECT! somebody usually goes to the boss and tattles on them. The end result is usually the boss communicating with the slacker to get their work done or else suffer the consequences!

It's NO DIFFERENT in your body. The body actually tattles o itself by producing some kind of pain to let you and your brain know that someone isn't working properly and your bodily production isn't at 100% of it's capability! If things don't change, production still decreases and you will suffer the consequences with continued unrelenting pain, and ultimately.....ILL-HEALTH!

NOW HERE'S THE DIFFERENCE:

The Chiropractor is the mediator and steps in to take care of the situation by putting the troubled shifted vertebra back into it's correct position, taking the strangle hold off your spinal cord and spinal nerve. Thus, your brain can once again communicate with your muscles and organs restoring their jobs that they do. Thus ending your PAIN CYCLE!

IT'S THAT SIMPLE!!!!!!

Now I hate to sound like a nagging parent, **BUT, YOU HAVE 3 CHOICES.....**

- 1.) Continue self-medicating and living with the terrible pain, FOREVER!!!
- 2.) Admit your mid back pain is ruining your life and do something other than temporarily covering your mid back pain up with drugs; which by the way, may be damaging your kidneys and liver.
- 3.) **FIX once and for all the cause of your mid back pain, IF AND ONLY IF this is something that interests you, READ THE REST OF THIS REPORT TO FIND OUT HOW!**

HERE'S WHY MOST MID BACK PAIN NEVER GOES AWAY...

- 1.) DRUGS DON'T FIX MID BACK PAIN!!! They only temporarily hide it!
- 2.) Most mid back pain is MISDIAGNOSED AND MISTREATED!

HELLO & WELCOME TO FLORIDA CHIROPRACTIC CLINICS!

FLORIDA CHIROPRACTIC CLINICS Doctors of Chiropractic have eliminated thousands of patients mid back pain here in the state of FLORIDA as well as all over the United States.

If you live in the TAMPA area and would like to have a “FREE MID BACK PAIN EVALUATION,” we offer this service as well as a FREE CONSULTATION where you will be able to sit down with one of the doctors and discuss EVERYTHING you want to tell us about your condition.

We provide a FREE MANUAL MUSCLE TEST, which will show you, RIGHT BEFORE YOUR EYES, exactly the severity of your problem and if you are in the right place to get RELIEF! There will be NO mistaking TO YOU if your condition will be helped through Chiropractic Care and services.

If after the FREE MANUAL MUSCLE TEST & CONSULTATION, we feel that you have shifted vertebrae in your spine causing your mid back pain, and IF AND ONLY IF you want relief that you have been longing for, we will arrange another appointment, possibly that same day, for you to receive x-rays and start the ball rolling on your way to becoming FREE FROM YOUR MID BACK PAIN!

If this INTERESTS YOU, and YOU ARE TIRED of the same results from previous methods, simply call one of our FLORIDA CHIROPRACTIC CLINICS offices to schedule your appointment.

FLORIDA CHIROPRACTIC CLINICS
